

Promisec Provides MSPs Clientless Solutions for Rapid Deployment of Security Management, Compliance, and Green IT

Implemented in Minutes, New Software Gives MSPs Complete Visibility of All Customer Endpoints for Security Management, Compliance, and Power Savings with Rapid Deployment

New York, NY - November 12, 2009: In light of pressure on Managed Service Providers (MSPs) to provide comprehensive managed security solutions, [Promisec](#) announces the release of the only [clientless software](#) solution to provide total visibility of all endpoints. The [Promisec MSP](#) solution audits and monitors endpoint applications, agents, hardware vulnerabilities, and power settings, and remediates threats to the internal network.

“Security, compliance, and cost savings are immediate needs of all companies,” said Robin Mayo, President of Promisec US. “The only question is how fast you can show value. What we’re providing can be implemented in minutes, covering all endpoints without expensive or time-consuming agent deployment. The clientless architecture means immediate revenue and low maintenance costs. In today’s competitive environment, this is the kind of difference that gives MSPs a competitive edge.”

Promisec MSP is a fully automated clientless software solution that provides comprehensive 24/7 visibility and control of endpoints. The solution eliminates security threats, ensures compliance to company, regulatory, and standards policies, and provides power optimization to the internal corporate network.

“Managed service providers are interested in extending the security management they give to their customers, both as a source of revenue, and as a response to customer demands,” says Ariel Avitan, Industry Analyst, Network Security Technologies at Frost & Sullivan. “Solutions like Promisec’s INNERspace offer a technology with a full range of compliance and security management services without the typical headaches of installing and maintaining software at the customer site.”

Promisec MSP Features & Benefits include:

- Quick proof of concept and rapid deployment
- Immediate revenue and immediate cost savings for customers
- Trustworthy and foolproof system
- Complete and customized inventory reporting
- Comprehensive auditing and analysis
- Security monitoring and alerts
- Modular feature structure for additional revenue
- Power management and Green IT
- Compliance
- Low maintenance costs and centralized management for easy operation
- No maintenance at customer site, minimizing helpdesk calls

With Promisec’s Clientless Endpoint Management (CEM) system, Managed Service Providers can expand their security and network management offerings without expensive, time-consuming deployments. Promisec Clientless Endpoint Management software solutions successfully protect hundreds of organizations worldwide, eliminating threats and optimizing corporate internal networks with unprecedented visibility and control.

“Many of today’s external threats are designed to evade detection by traditional reactive security solutions. MSPs should provide proactive endpoint security services to protect against unknown threats, zero-day attacks and others,” said Dan Yachin, Research Director at IDC. “Using a clientless service can help MSPs address some of these challenges. For the most part, a clientless service eliminates the administrative burden of installing multiple software clients on customer desktops and shortens the implementation time at customer sites. In addition, using a clientless service can ease the burden that is often imposed on customer desktops due to the need to continually configure and update the software.”

About Promisec

Promisec, Inc. delivers Clientless Endpoint Management (CEM) software solutions that eliminate threats and optimize corporate internal networks with unprecedented visibility and control over the endpoints. Promisec’s patented technology allows IT managers to identify and resolve security, compliance and policy issues in a matter of minutes, without making any changes to the network or endpoints.

Founded in 2004 by former military intelligence experts, Promisec's management team brings broad high-level executive experience in the network security industry.

Promisec is a privately held company with headquarters in Israel and offices in New York, Tokyo and Paris. Our customers include Forbes Global 2000 companies and other organizations in the manufacturing and service industries as well as government and health care institutions.
