

Adobe Flash and PDF Critical Security Vulnerability: Promisec Offers Free Network Inspection to Identify 100% of At Risk Endpoints

New York, NY – June 14, 2010: In response to [Adobe's critical security vulnerability](#) APSA10-01 for Adobe Flash, Reader, and Acrobat, Promisec is offering a free 40-minute audit using the [Promisec Spectator](#) agentless endpoint inspection tools. The audit will identify all computers running a vulnerable version of Adobe software in the organization's network.

Adobe warned that the vulnerability can cause a crash and potentially allow an attacker to take over an affected system. The warning mentioned reports that the vulnerability is being actively exploited. Adobe provided steps to remediate the error on affected computers. The free inspection from Promisec will serve organizations to quickly identify those computers which require remediation.

"As a company that cares deeply about enterprise security, we are making this offer in response to the Adobe vulnerability," said [Roni Suchowski, CTO of Promisec](#). "We can identify exactly which computers are running vulnerable versions of Adobe software in approximately [5 seconds per computer](#). In most organizations, that means that within 20 minutes, IT managers can get a full list of every computer that needs attention."

Using its breakthrough [agentless technology](#), Promisec can perform the inspection without installing any agents on the endpoints themselves. Enterprises who are interested will download the trial software, which can be installed on any PC connected to the network in minutes. From a single PC, using administrator privileges, Promisec Spectator can inspect every endpoint on the network. Organizations with upwards of 1000 endpoints are eligible for this trial. The trial will cover a single location of up to 10,000 endpoints.

Promisec® Spectator® is a lightweight agentless endpoint management software solution for rapid audits of endpoints at a single location. Promisec® INNERspace™ is a fully [automated enterprise-class agentless software](#) solution that provides large organizations with comprehensive 24/7 visibility & control of endpoints, including support for distributed enterprises.

For more information, please send an e-mail to marketing@promisec.com or request a free trial at <http://www.promisec.com/products/get-a-free-trial/>

About Promisec

Promisec, Inc. delivers Clientless Endpoint Management (CEM) software solutions that eliminate threats and optimize corporate internal networks with unprecedented visibility and control over the endpoints. Promisec's patented technology allows IT managers to identify and resolve security, compliance and policy issues in a matter of minutes, without making any changes to the network or endpoints.

Founded in 2004 by former military intelligence experts, Promisec's management team brings broad high-level executive experience in the network security industry.

Promisec is a privately held company with headquarters in Israel and offices in New York, Paris, Mumbai and Tokyo. Our customers include Forbes Global 2000 companies and other organizations in the manufacturing and service industries as well as government and health care institutions.
